INT.CL. : B66F 9/075

TITLE : BATTERY TABLE FOR INDUSTRIAL
VEHICLE

ABSTRACT : PURPOSE: To eliminate the need for a storage for a battery table used in clamping an existing battery or for carrying it, in a battery type forklift truck, by accommodating the battery table inside a vehicle body when drawing out the battery.

CONSTITUTION: In working, a battery table 2 is accommodated below a battery 12 in the center of a vehicle body 10. For using the battery table 2, a lock device 15 is released to open a cover 13. By pulling a knob 4, the battery table 2 is drawn out until a stopper 9 has come into contact with a frame 8, and a leg 5 is made to stand by a lever to fix the battery table 2. In drawing out the battery 12 for maintenance, a lock device 16 is released after installing the battery table 2 to open the cover 14. The battery 12 is rolled and drawn out on rollers so as to be accommodated in a battery frame 7. Accommodating work for the battery 12 and the battery table 2 is carried out in a contrary order to previous operation.
